Quantrac Corporation has created a Custom Flat Rate Pricing scenario for dealerships that don't wish to purchase pricing books from other vendors. It allows dealerships to create their own Flat Rate pricing structure and to publish price books based on the actual costs of providing services. With Quantrac Custom Flat Rate Pricing, users can employ established parts, materials, and labor costs and prices, to create a list of Flat-rated repairs and retail prices for each repair. Prices can be based on the actual cost of the repair (times your desired multiplier), the sum of the retail prices of each individual item used in the repair, or any other method you may desire. You can also update your entire pricing scenario and print new pricing books at any time you wish.

With the purchase of any HVAC Office product, Carrier Alliance & Bryant Select Dealers will get our Carrier/Bryant Module for **FREE**. (\$225.00 Value) In addition we will also give a **10% Discount** off the purchase of any HVAC Office products.

Quantrac 2004 is a relational database real-time office management system created specifically for heating and air conditioning contractors/dealers. It was originally created by the owners of an air conditioning and heating contractor/dealership. With software programming professionals the program has been in development and operation since 1991. With every new release, new features, improvements, and enhancements have been developed and added to help your business serve your customers.

Use it to run your business & accumulate customer data that is

Why *Quantrac 2004*

- When your customers call for service, you have instant access to their service history, installations, equipment, warranties, invoices, and all other customer and jobsite data. You can add a new service call in seconds!
 - You are able to efficiently track sales leads and installations, calculate sales quotes, job costs and invoices, and manage accounts receivable.
 - The system completely handles the time-consuming task of managing your maintenance contracts by automatically creating contract service calls when due, by tracking these calls through the system, and by generating renewal letters.
 - You are able to effectively manage your company's service technicians by taking advantage of the Quantrac's extensive dispatching and scheduling features, including alphanumeric paging.
 - You can instantly analyze the performance of your company and its employees, generate mailings to your customers, and produce reports on virtually every aspect of your business.

The Service Scheduler enables you to minimize technician travel and other unapplied time by tracking service calls from beginning to end and by providing your dispatchers with all the information they need to process calls quickly and efficiently.

Service Scheduler

- The Service Scheduler enables you to minimize technician travel and other unapplied time by tracking service calls from beginning to end and by providing your dispatchers with all the information they need to process calls quickly and efficiently.

Assigned Service Call Form

The Assigned Service Call Form is one of several screens used to manage service calls. From this form you can perform a variety of functions

You can perform a variety of functions

10h Installation Form

Quantrac 2004 can completely manage your installations. You create "installation calls" and service calls to effectively coordinate your crews, and Quantrac 2004 enables you to quickly create new installation records, calculate job costs, print "pick lists" and work orders, and create invoices for installations.
